

CASHENVOY MAGENTO PLUGIN

NOTICE This plugin is basically for Cashenvoy Payment gateway and by default it is in the TESTMODE status.

For comments and other information you can contact support@cashenvoy.com or oyelami@cashenvoy.com. Hope you will find this guide useful. Wishing you a bug free integration process.

HOW TO INSTALL

Extract the compressed file you received or downloaded from Cashenvoy, you should have two (folders) namely: CashEnvoy, mycashenvoy and CashEnvoy_Mycashenvoy.xml and success.phtml files.

Kindly follow the following steps to install the plugin.

1. Open the file redirect.phtml in the folder mycashenvoy with any Text Editor of your choice.

a. Change the merchant id from the default value of '5' to your merchant id.

b. Change the secret key value to your own

c. Change the \$cememo and \$cecustomerid to your store name

d. Change the \$cenurl value from <http://carts.cashenvoy.com/magento/mycashenvoy/payment/response> to <http://yourstoreaddress.com/mycashenvoy/payment/response>

2. Open the file PaymentController.php in the folder CashEnvoy/Mycashenvoy/controllers with any Text Editor of your choice.

3. After you might have made and saved the above changes, go to your webstore (hosting) directory

a. Copy the CashEnvoy folder to your store app/code/local directory

b. Copy the mycashenvoy folder to store /app/design/frontend/base/default/template directory

c. Copy the CashEnvoy_Mycashenvoy.xml to your webstore app/etc/modules

d. Copy and replace the success.phtml to the /mag/app/design/frontend/base/default/template/checkout/ directory

**** your_theme instead of the default****

4. Clear your cache, login to the admin section and do System->Configuration->Payment Method (You should see CashEnvoy at the top), enabled it if it is not by default and do other settings of your choice.

5. You can now test the payment by making an Order, CashEnvoy should appear on the checkout payment list.

HOW TO MOVE TO LIVE MODE

After you have successfully sent the required documents to support@cashenvoy.com and you have been instructed that you can now change your settings “live mode”, then you can do the following: Open the file redirect.phtml in the folder mycashenvoy In the form action change the sandbox to webservice and also in the PaymentController.php file, change the sandbox in this “\$client->setUri('https://www.cashenvoy.com/sandbox/?cmd=requirement')” to webservice. Save and upload those files back to their respective directory on your webserver. ALL THE BEST
